

Major Assignment Submission Agile

Q1) Design a comprehensive Scrum framework that encompasses the essential Scrum roles, outlines the key activities within the Scrum process, and specifies the time durations associated with each phase of the Scrum methodology, ensuring an effective and efficient approach to project management.

Designing a comprehensive scrum framework for Call Centre

Q) What is Scrum?

Scrum is like planning your week in small chunks instead of the whole year. Instead of trying to fix everything at once, Scrum helps call center teams work in short, Focused cycles (called sprints) to:

- Solve real Problems
- Make improvements fast.
- Adjust plans as needed.

Scrum Roles (Who's doing what?)

- **1) Role:**
Product owner

Major Assignment Submission Agile

- **Call Centre Equivalent:** Call Centre manager or project Sponsor

- **What they do:**

- Decides what's most important to work on.

Example: "We need to reduce call wait time."

- **2) Role:**

Scrum Master

- **Call Centre Equivalent:**

Team Leader or Supervisor

- **What they Do:**

Keeps the team on track, remove roadblocks. Like a coach.

- **3) Role:**

Development Team

- **Call Centre Equivalent:**

QA, IT, Trainers, Agents, Process Experts

- **What they Do:**

Do the actual work – like training, system updates, Process Changes.

Major Assignment Submission Agile

SR.NO	Role	Call Centre Equivalent	What they do
1	Product Owner	Call Centre Manager or Project Sponsor	Decides what's most important to work on. Example: "We need to reduce call wait time."
2	Scrum Master	Team Leader or Supervisor	Keeps the team on track, removes roadblocks. Like a coach.
3	Development Team	QA, IT, Trainers, Agents, Process Experts	Do the actual work—like training, system updates, process changes.

Scrum Activities (What do we do and when?)

Activity	Description	Time Needed
Sprint Planning	The team decides what to fix or improve in the next 1-2 weeks.	2-4 hours.
Daily Scrum	Quick daily check-in : What did I do yesterday? Any blockers?	15 minutes.
Sprint Execution	Team works on selected tasks (e.g. improving scripts, Testing IVR)	1-4 weeks (usually 2)

Major Assignment Submission Agile

Sprint Review	Team shows what they did. Get feedback from manager/stakeholders.	1-2 hours.
Sprint Retrospective	Team reflects: What worked? What didn't ? How can we improve?	1-1.5 hours.

Scrum Artifacts (Ours Tools)**1) Artifact:**

Product backlog

What it Means in a call centre:

List of everything we want to improve or build.

Example:

Add callback option, new call script

2) Artifact:

Sprint Backlog

What it Means in a Call Centre :

What we plan to work on this sprint (2 weeks)

Example:

Improve call wrap-up process

3) Artifact:

Increment

Major Assignment Submission Agile

What it Means in a Call Centre:

What's done and ready to use.

Example:

New agent dashboard, Update SOP.

Real-Life Call Centre Example

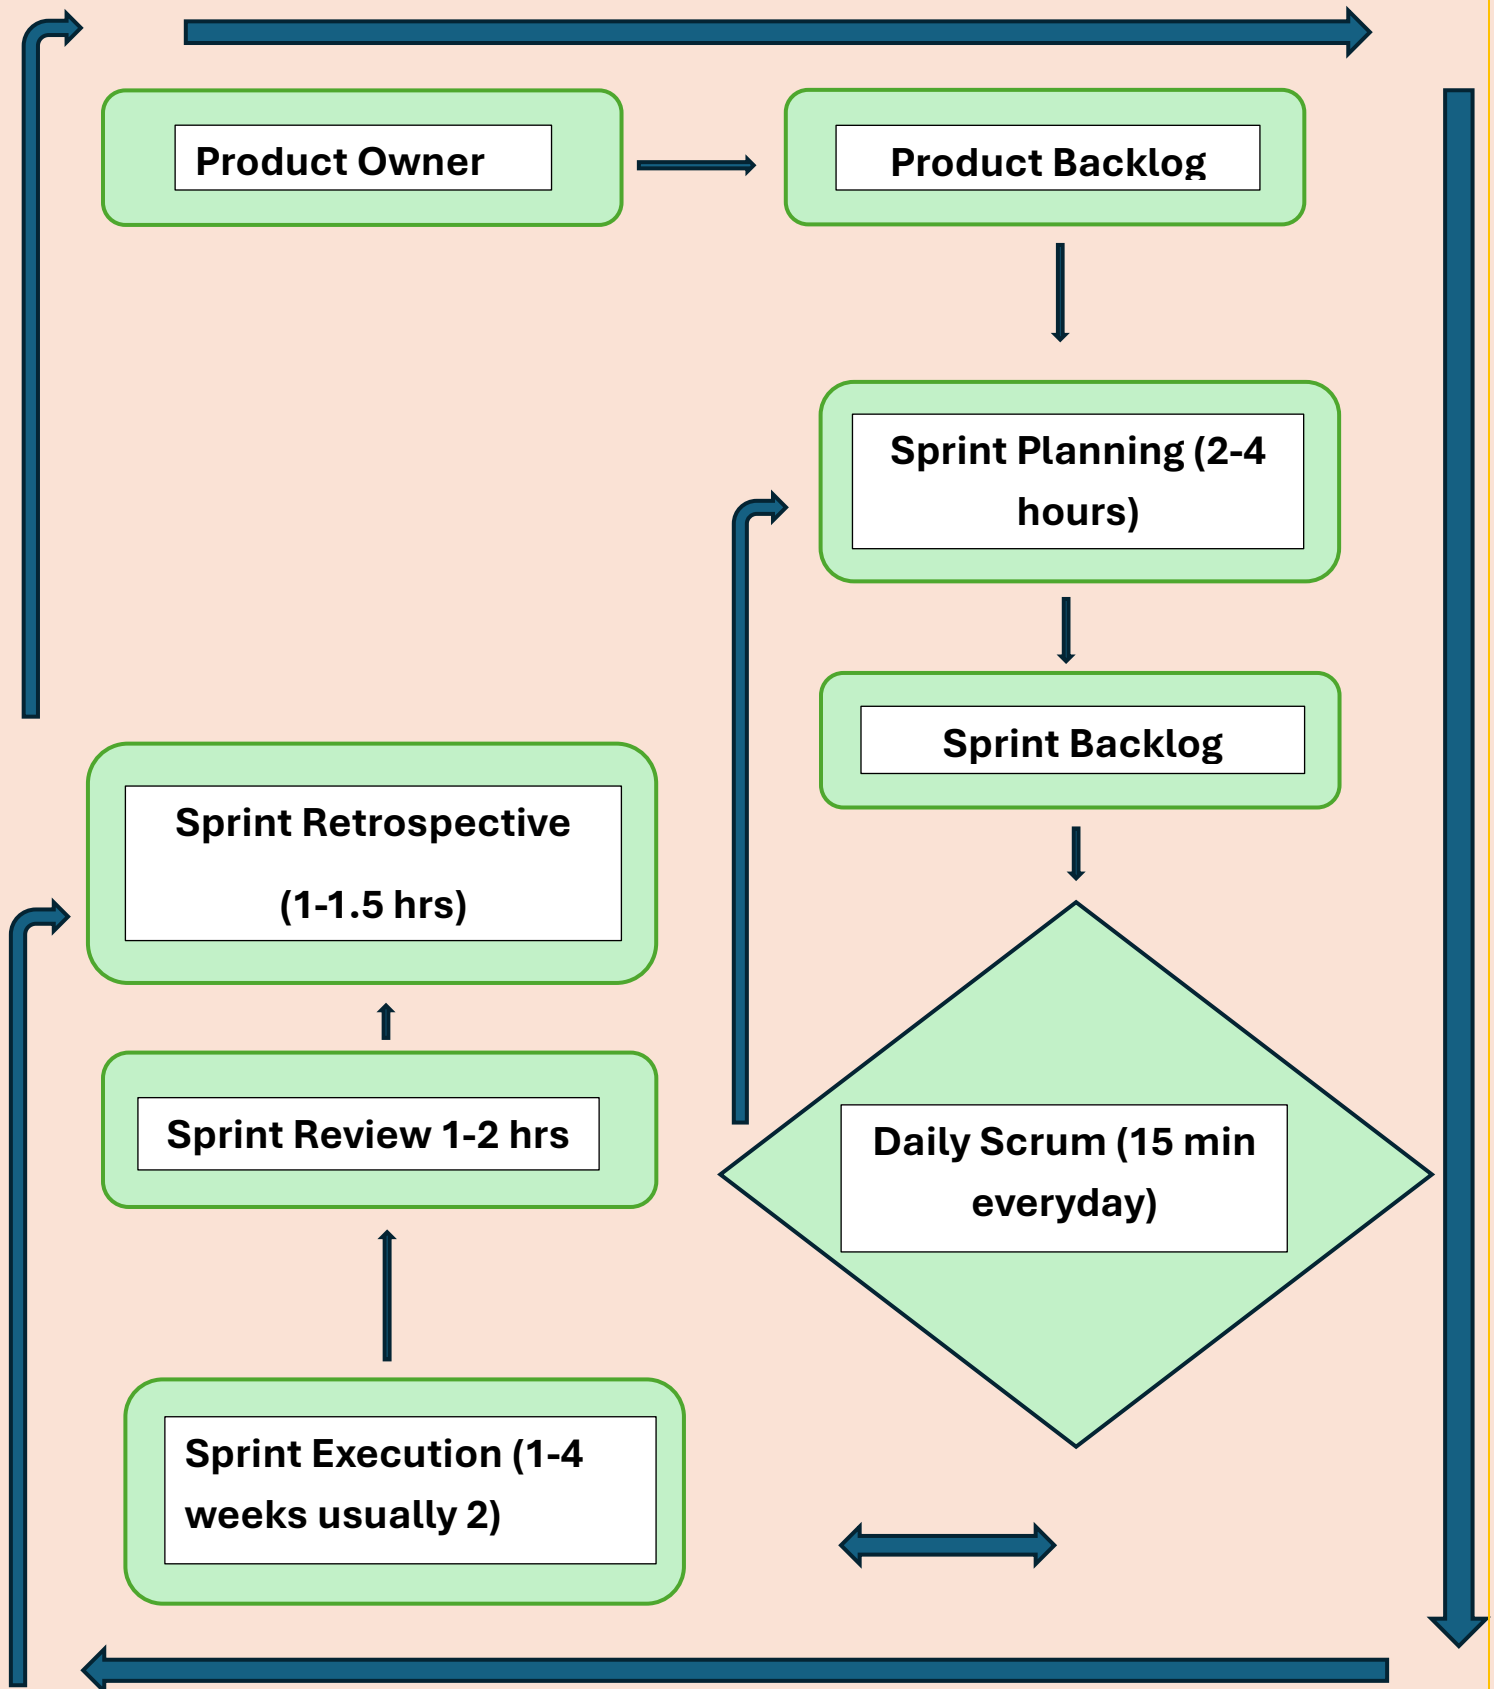

Goal: Reduce average call handling time (AHT)

Sprint Plan Includes:

- QA team analyzes top 50 calls.
- Trainers create a shorter greeting script.
- IT automates part of the post-call form.
- Supervisors give feedback to agents.

Result:- AHT reduced by 12 seconds in 2 weeks.

Why Scrum Works for Call Centre ?

Sr.No	Benefits	Why its Matters
1	Small tasks, big progress	Teams can focus without getting overwhelmed.
2	Quick feedback	Managers and customers see improvements fast
3	Team collaboration improves	Everyone shares updates daily
4	Adapts to changing needs	Easy to change direction after each sprint

Major Assignment Submission Agile

Summary:

- **List all problems/improvements** in the **Product Backlog**
- **Pick top priorities** for the **next 2-week Sprint**
- **Meet daily** to stay aligned and solve blockers
- **Deliver real improvements** every Sprint
- **Review and improve** at the end of each Sprint
